Friendsville, TN 37737

Dear David:

I would like to congratulate you and all the folks at Well-Mate on such a successful and innovative product. I have been using mine in my boat for the past year and couldn't be happier with the results.

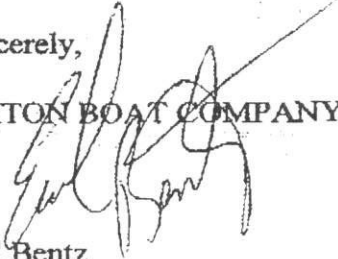

Once I open my livewell and drop the fish into my Well-Mate, it makes the removal of bass from the livewell much easier and less painful than having to chase the fish around in the well. Thus, it helps keep my catch healthier, because I am handling them less than I would without the Well-Mate. It makes me feel good to know that my bass have a better chance now to be released in a much healthier state than without the Well-Mate, especially in a tournament situation.

I have also enjoyed its convenience while crappie fishing this past year, and I find that I no longer get "finned" by having to chase crappie around in the well in order to take them to my cleaning area. I simply grab the handles, lift the Well-Mate out of my livewell, and transport the crappie to the place where I clean them.

Again, congratulations on such an innovative new product. It adds another level of enjoyment to my day on the lake, and for this I am most appreciative.

Sincerely,

TRITON BOAT COMPANY

Earl Bentz
